

Breeze® Self-Adhesive Resin Cement

Presenting Breeze® Self-Adhesive Resin Cement, one of the strongest*, most convenient, auto-mix self adhesive cement available.

When it's time to cement indirect restorations clinicians demand a product that is simple and convenient to use while providing high bond strength. After devoting time and energy creating a restoration to improve a patient's smile and self-esteem, don't settle for less than ideal adhesive materials for placement. **Make cementation a breeze.**

Breeze® Self-Adhesive Resin Cement

This self-etch formulation incorporates new resin technology for enhanced bond strength with greater reliability. Upon application, Breeze Cement quickly goes to work to condition dentin, enamel, and the restoration all in one quick and simple step. By eliminating the etching, priming and bonding steps, both postoperative sensitivity and procedure time are drastically reduced, improving peace of mind and freeing up precious chair time.

- > **Exceptional bond strength** - Adheres to dentin and enamel without a bonding agent
- > **Dual-cure** - Light-cure or self-cure for maximum versatility
- > **Convenient auto-mix delivery system** - Single-step accurate placement with minimal waste
- > **Contains fluoride** - Provides a sustained fluoride release to minimize the potential for caries
- > **Versatile shade selection** - Choose from A2, Translucent, and Opaque White to satisfy all cosmetic needs

1 > Dispense

Dispense Breeze® Cement directly into restoration.

2 > Place

Seat restoration.

3 > Cure

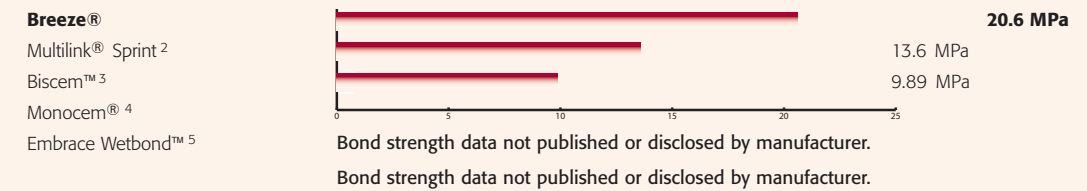

Light cure or self cure.

What doctors are saying about Breeze Cement:

"Breeze® Self-Adhesive Resin Cement makes cementation easy whether it's a post or crown and clean-up is a snap. Whether you're luting metal, fiber, composite or ceramic restorations, Breeze® is my luting agent of choice"
- Gregori M. Kurtzman, DDS, MAGD, FACD, DICOI

"I'm a big fan of self etching resin cements and I'm especially a fan of Breeze® Cement. It is easy to use, easy to clean up, and provides an incredible bond to both metals and ceramics."
- John C. Flucke, DDS

"Breeze® Cement provides me with controllable working time and excellent bond strength. It has become my only choice for a self-adhesive resin cement."
- Michael Maroon, DMD
Founder & Fellow, Academy of Comprehensive Esthetics

One Cement – Multiple Applications

Breeze Self-Adhesive Resin Cement is formulated to accommodate virtually all cementation procedures.† Its advanced resin technology and low expansion ensure compatibility with multiple substrates including composite, semi-precious metals, precious metals, and cementable ceramics.
